Dilkhosh Sadoun

Flutter & PHP Developer

Norway · +47 925 38 781 · dilkhoshsadoun98@gmail.com
dilkhosh-sadoun.is-a.dev · github.com/DilkhoshSaadon98

PROFILE

Flutter and PHP developer who designs and builds complete products independently: database, API, mobile and desktop apps, and the admin panels that run them. Work is in production, including a live restaurant website and staff system, a multi-app marketplace with a digital wallet, and a driving-theory learning app available in four languages.

EXPERIENCE

Freelance Flutter & PHP Developer
2023 – Present

Self-employed · Norway

- Design and deliver full-stack products end to end, from database schema and REST APIs to Flutter apps and deployment.
- Build multilingual, right-to-left interfaces and role-based security (two-factor sign-in, permissions, rate limiting).

DCDuhok — Founder
2022 – Present

Duhok, Iraq · Electronics and Arduino supplier for students and IT departments

- Founded and run a business supplying Arduino boards, sensors, motors and other electronic components to IT and engineering departments and students in Duhok.
- Built the store’s mobile app and admin panel for the product catalogue, orders and stock.
- Guide students through their graduation projects, from choosing components and wiring circuits to programming the hardware and connecting it to software.

Mr Robot — Software Developer
2023 – 2024

Duhok, Iraq · First employee, founding team

- Joined as the company’s first employee and helped set up its products and ways of working as part of the founding team.
- Designed and built the company’s point-of-sale (POS) cashier system.

SELECTED PROJECTS

Glør Restaurant — Website & Admin Panel
Client project · Live

- Built the restaurant website (glør-restaurant.no) with a multilingual menu and allergen information, table bookings by capacity and opening hours, photo reviews, FAQ and a mailing list.
- Developed a Flutter admin panel for web, Windows and Android with role permissions, two-factor sign-in, live booking alerts and backups.
- Implemented server-rendered pages with structured data for search, and reduced request concurrency so the shared host stayed stable under load.

Stack: PHP, MySQL, Flutter, JavaScript, Tailwind CSS, JWT

Glør Staff — Staff & Shift Management
Client project

- Rosters by department with templates, open shifts and manager-approved swaps.
- Kiosk clock-in, timesheets approved and exported to PDF, tip sharing, messaging and tasks.
- Two account levels, two-factor sign-in and encrypted sensitive data; available on iPad and phone in Arabic and English.

Stack: Flutter, Dart, PHP, MySQL

Sooq — Marketplace, Delivery & Digital Wallet
Own product

- Built seven Flutter apps (customer, courier, store, platform admin, wallet, wallet agent and wallet admin) on one shared core package.

- Implemented wallet top-ups, phone and QR transfers secured by PIN, loyalty points, and identity verification with device binding and biometrics.

Stack: Flutter, Dart, PHP, MySQL, REST

Teorivei — Norwegian Driving Theory App

Own product

- Learning app in Arabic, Kurdish Sorani, English and Norwegian, with lessons, sign quizzes, timed mock exams, readiness tracking and a driving game.
- Built a content pipeline that turns source material into structured multilingual questions, plus an admin panel for users, access and game levels.

Stack: Flutter, Dart, PHP, MySQL

Personal Portfolio

dilkhosh-sadoun.is-a.dev

- Static site in Arabic, English and Norwegian, generated from Supabase through GitHub Actions and hosted on Cloudflare Pages, with a Flutter admin panel and row-level security.

EDUCATION

BSc Computer Science — University of Duhok

2019 – 2024

SKILLS

Mobile & Desktop: Flutter, Dart, BLoC / Cubit, Clean Architecture, get_it

Backend: PHP 8, MySQL / MariaDB, PostgreSQL, Supabase, REST APIs, JWT

Web: HTML, CSS, JavaScript, Tailwind CSS, SEO

Tools: Git & GitHub, GitHub Actions, Cloudflare, Firebase
